Then at my Desk after 2016 CSE, Now What?

Q1 & A1.1

Q1. How could the **scientific quality** of the manuscripts published in these journals be improved?

A1.1 Strengthening the peer review process

- Reviewing the database of existing evaluators
- Inviting new reviewers by selecting authors of highly cited articles in journals of the same subject category

Q1 & A1.2

A1.2 Drawing the attention of featured authors who have previously published highly cited articles in the journal , by inviting them to submit manuscripts free of charge

Q2 & A2.1

Q2. How could the **visibility** of the manuscripts published by these journals be improved?

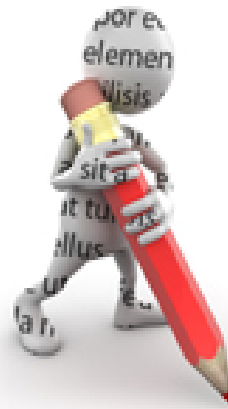

A 2.1 Monitoring the timely updating of databases with each new edition

Q2 & A2.2

A 2.2 Selection of appropriate Keywords

A controlled vocabulary with keywords used in highly cited papers

Q3 & A3

Q3. How can these **actions be implemented** in the journals of my University?

A3. Write a project

«Improvement of the quality and visibility of the journals published by the PUCV and construction of a manual of good practices»

When the first results could be obtained?

We are just starting and results are long-term

Indicators of achievement:

- (i) Increase in the impact factor
- (ii) Move forward within the quartile in the subject category
- (iii) Ideally migration to a higher quartile

In conclusion

What I learned after CSE 2016 has already started to be implemented in a set of journals published by the Pontifical Catholic University of Valparaíso - Chile
