

Six Haikus **Jyothirmai Gubili**

Autoimmunity
fail thymic learning
barbaric T lymphocytes
wreak havoc in self

Angiogenesis
newborn blood vessels
tumors grow and run amuck
Avastin cripples

Cancer
telomerases
elixir for telomeres
blissful cancer cells

Microarrays
ATGC chips
light up erring tumor genes
assault on disease

Alzheimer's
amyloid and tau
rogue proteins enmesh the mind
no memory lane

Spring
early march snowflakes
behold the beautiful sight
spring a blink away

JYOTHIRMAI GUBILI is an editorial associate with the Integrative Medicine Service at Memorial Sloan-Kettering Cancer Center in New York. Her work involves researching and writing monographs for the "AboutHerbs" Web site and providing editorial assistance for book chapters and articles. She previously worked at the Scripps Research Institute in San Diego. She is a coauthor of molecular-biology research articles and book chapters on integrative oncology. She holds a master of science degree in microbiology from the University of Hawaii.
